Subject Index

Volume 22, 1989

Academic medicine
management science in, 99
Accessory pathways
bilateral, and tachycardia in Wolff-Parkinson-White syndrome, 173
in permanent junctional reciprocating tachycardia, 249
Acidosis
and effects of reoxygenation on Purkinje fibers, 317
Aging
and cardiac refractoriness, 221
Aortic valve stenosis
impaired left ventricular ejection performance in, 45
Arrhythmias. *See also* Parasystole; Tachycardia
from cocaine infusions in dogs, 159
concealed ventricular hexageminy, 167
and exercise ECG in sick sinus syndrome, 139
and mexiletine affecting infarcted Purkinje tissues, 81
paroxysmal atrial fibrillation, 153
and REM sleep in rats, 235
and transthoracic defibrillation threshold of various waveforms, 241
Atrial fibrillation
paroxysmal, 153
Atrioventricular block
complete, sinus node electrogram in, 303
REM sleep and bradyarrhythmias in, 235
Atrioventricular node
conduction in atypical Wenckebach periodicity, 227
junctional rhythm in trifascicular block, 257
refractory periods related to age, 221
Atrioventricular tachycardia
reciprocating
permanent form of, 249
in Wolff-Parkinson-White syndrome, 173
reentry, conduction times in, 73
Atrium
left
enlargement diagnosis with ECG, 359
P maps of rhythm in, 27
refractory periods related to age, 221
Body surface maps
dipole localization in, 105
in hypoplastic right ventricle analysis, 195
inhomogeneities affecting, 53
of P waves in left atrial rhythm, 27
and ST-segment in myocardial infarction, 333
of ventricular activation and recovery, 211
Bradyarrhythmias
and REM sleep in rats, 235
Bundle branch block
left, and body surface maps of ventricular activation and recovery, 211
and planarity of spatial QRS loop, 143

Calcium
hypocalcemic torsades de pointes, 89
T wave morphology in hypercalcemia, 125
and ventricular excitability, 307
Cerebrovascular disorders
and ST-segment elevation in subarachnoid hemorrhage, 133
Cesium
and ventricular excitability, 307
Children
QT interval during exercise, 17
Chinese population
normal limits of ECG in, 1
Cocaine
electrophysiologic effects in dogs, 159
Computer use
in analysis of ECGs from Chinese individuals, 1
in analysis of spatial QRS loop planarity, 143
in conduction studies in alternating reentry tachycardia, 73
in modulated parasystole model, 277
in studies of vectorcardiographic bites, 325
Conduction
in alternating reentry tachycardia, 73
in atypical atrioventricular Wenckebach periodicity, 227

Conduction *(Continued)*
and body surface maps of ventricular activation and recovery, 211
defects in sinus node abnormalities, 297
Contribution maps
in studies of torso inhomogeneities, 53
Coronary artery disease
and heart rate-adjusted indices of ST-segment depression, 187
R peak delay in, 349
Countershock
and transthoracic defibrillation threshold of various waveforms, 241

Defibrillation
transthoracic threshold of various waveforms in, 241
Depolarization
ventricular, and excitability, 307
Dipole localization
in body surface mapping, 105

Echocardiography
in left atrial enlargement, 359
in study of U wave inversion, 365
Ectopy, ventricular
and definition of ventricular tachycardia, 21
Electrogram
sinus node, in complete atrioventricular block, 303
Electrophysiologic studies
of age-dependent cardiac refractoriness, 221
of cocaine effects in dogs, 159
of sinus node in conduction defects, 297
Endocardial cushion defect
and hypoplastic right ventricle analysis with body surface mapping, 195
Excitability, ventricular
active membrane components of, 307
Exercise ECG
in children, QT interval in, 17
and heart rate-adjusted indices of ST-segment depression, 187
in sick sinus syndrome, 139
Extrasystoles
concealed ventricular hexageminy, 167

Fibrillation
atrial paroxysmal, 153
ventricular, and transthoracic defibrillation threshold of various waveforms, 241

Geometry data
area vector in analysis of QRS loop planarity, 143
for body surface potentials, 53

Heart block
atrioventricular
complete, sinus node electrogram in, 303
REM sleep and bradyarrhythmias in, 235
bundle branch
and body surface maps of ventricular activation and recovery, 211
and planarity of spatial QRS loop, 143
sinoatrial, REM sleep and bradyarrhythmias in, 235
trifascicular, atrioventricular junctional rhythm in, 257
Heart rate
and ST-segment depression in exercise ECGs, 187
Hemorrhage, subarachnoid
ST-segment elevation in, 133
Holter monitoring
in supernormal modulation of ventricular parasystole, 293
Hypercalcemia
T wave morphology in, 125
Hyperkalemia
and effects of reoxygenation on Purkinje fibers, 317
Hyperkalemia-like ECG changes
in hypokalemia, 93
Hypertension
U wave inversion in, 365
Hypertrophy, ventricular
and planarity of spatial QRS loop, 143
Hypocalcemia
torsades de pointes in, 89
Hypokalemia
and hyperkalemia-like ECG changes, 93
Hypoplastic right ventricle
analysis with body surface mapping, 195
Hypoxia
and effects of reoxygenation on Purkinje fibers, 317

Infarction, myocardial
acute inferior
ST elevation and QRS loss in, 343
ST-segment potential distribution in, 333
anterior
comparisons of precordial maps and standard ECGs in, 113
R peak delay in, 349
and mexiletine affecting Purkinje tissues, 81
and planarity of spatial QRS loop, 143
right ventricular, 181
simulation of hyperacute phase in, 133
simulation by hyperkalemia-like ECG changes, 93
vectorcardiographic bites in, 325
Inhomogeneities
affecting body surface potentials, 53
atrioventricular, in atypical Wenckebach periodicity, 227
International Congress on Electrocardiology
abstracts from, 263
Ischemia
and effects of reoxygenation on Purkinje fibers, 317

Lactate
and effects of reoxygenation on Purkinje fibers, 317

Mexiletine
effects on infarcted Purkinje tissues, 81

Neurologic disorders
and ST-segment elevation in subarachnoid hemorrhage, 133
Normal limits of ECG
in Chinese population, 1

P wave
body surface maps in left atrial rhythm, 27
in normal Chinese individuals, 1
terminal force analysis in atrial enlargement, 359
Pacemaker therapy
and body surface maps of ventricular activation and recovery, 211
development of, 99
Parasystole
and concealed ventricular hexageminy, 167
intermittent, experimental model of, 277
sinus impulses affecting, 285
supernormal modulation of, 293
in trifascicular block with asynchronous intraventricular recovery, 257
Planarity
of spatial QRS loop, 143
Potassium
hyperkalemia-like ECG changes in hypokalemia, 93
hyperkalemic Purkinje fibers affected by reoxygenation, 317
PR interval
in atypical atrioventricular Wenckebach periodicity, 227
Precordial 49-lead ECG maps
compared to standard ECGs in myocardial infarction, 113
Pulmonary atresia
and hypoplastic right ventricle analysis with body surface mapping, 195
Purkinje fibers
mexiletine affecting, in infarction, 81
reoxygenation of, effects of, 317

Q wave
in right ventricular infarction, 181
QRS complex
clockwise pattern in impaired left ventricular ejection performance, 45
loss related to ST elevation in infarction, 343
in normal Chinese individuals, 1
planarity of spatial loop, 143
simulated waveforms of standard leads, 53
sinus, in parasystolic cycle, 285
torso inhomogeneities affecting, 53
QT interval
in children during exercise, 17
in hypocalcemic torsades de pointes, 89
postexercise changes in sick sinus syndrome, 139

R peak delay
in coronary heart disease, 349
in impaired left ventricular ejection performance, 45
R wave
in normal Chinese individuals, 1
Refractoriness, cardiac
aging affecting, 221
Reoxygenation
of Purkinje fibers, effects of, 317

S wave
in normal Chinese individuals, 1
Serial ECGs
precordial 49-lead maps compared to standard ECGs in infarction, 113
Sick sinus syndrome
exercise ECG in, 139
Simulated potentials
torso inhomogeneities affecting, 53
Sinoatrial block
REM sleep and bradyarrhythmias in, 235
Sinus node
dysfunction in paroxysmal atrial fibrillation, 153
electrogram in complete atrioventricular block, 303
evaluation in conduction defects, 297
Sinus rhythm
in parasystole, 285
Sleep states
REM density and bradyarrhythmias in rats, 235
Sodium channels
and ventricular excitability, 307
ST-segment
elevation related to QRS loss in infarction, 343
elevation in right ventricular infarction, 181
heart rate-adjusted indices of depression in exercise ECGs, 187
in normal Chinese individuals, 1
potential distribution in infarction, 333
transient elevation in subarachnoid hemorrhage, 133
Subarachnoid hemorrhage
ST-segment elevation in, 133
Supernormal period
parasystolic capture in, 293
in trifascicular block with asynchronous intraventricular recovery, 257

T wave
morphology changes in hypercalcemia, 125
in normal Chinese individuals, 1

Tachycardia
atrioventricular reciprocating
permanent form of, 249
in Wolff-Parkinson-White syndrome, 173
atrioventricular reentry, conduction times in, 73
ventricular
changes in definition of, 21
and hypocalcemic torsades de pointes, 89
Torsades de pointes
in hypocalcemia, 89
Tricuspid atresia
and hypoplastic right ventricle analysis with body surface mapping, 195

U wave
inversion in hypertensive patients, 365

Vectorcardiography
bite amplitude in, 325
and planarity of spatial QRS loop, 143
Ventricles
excitability of, active membrane components in, 307
hypertrophy of, and planarity of spatial QRS loop, 143
left, and R peak delay in impaired ejection performance, 45
patterns of body surface maps during activation and recovery, 211
refractory periods related to age, 221
right
hypoplasia analysis with body surface mapping, 195
infarction of, 181
Ventricular hexageminy
concealed, 167
Ventricular tachycardia
changes in definition of, 21
and hypocalcemic torsades de pointes, 89

Waveforms
for defibrillation, transthoracic thresholds of, 241
QRS, simulated, for standard leads, 53
Wenckebach periodicity
atrioventricular, atypical, 227
Wolff-Parkinson-White syndrome
reciprocating tachycardia in, 173
